

Nous Infosystems Announces Strategic Partnership with Apprenda

By drastically cutting development time and capital requirements, Apprenda's revolutionary middleware technology SaaSGrid helps Nous laser focus on ISV customer needs

MIDDLESEX, NJ – June 9, 2010 – In an effort to uphold its mission to provide global quality software solutions, [Nous Infosystems](#) announced a strategic partnership with [Apprenda](#), creator of SaaSGrid, the market's leading application server for software as a service (SaaS). Nous will leverage SaaSGrid to expand and improve upon its on-demand enablement services, enabling them to laser focus on creating value for their clients.

As a new breed of middleware, SaaSGrid solves both the upfront and ongoing technical and business challenges of delivering software as a service in the most cost efficient manner possible. By providing software companies zero-effort multi-tenancy and grid scalability, along with “out of the box” application services like metering and monetization, billing and subscriber management, and much more, SaaSGrid is helping software companies achieve sustained market leadership through superior software delivery.

“Apprenda’s SaaSGrid was the only product on the market that democratizes SaaS architecture and operational systems and creates a clear path for our clients to become agile, SaaS businesses,” avers Mr. Ajith Pillai, President & CEO, Nous. “Our clients will now receive a drastic reduction in costs and operational complexities and we can focus on our strengths in application development.”

Nous evaluated SaaSGrid for both development time and time to market, two important factors to its ISVs clients.

About Nous

Nous Infosystems (Nous) is an ISO 9001:2008, ISO 27001:2005 & CMMI Level 5 v1.1 certified global Information Technologies Company. An ISV specialist, Nous brings with it assured delivery, predictable execution and a very strong product focus to help clients bring out superior products and transform their business visions into reality. Nous provides cost effective, high-quality solutions that address visioning, development, testing, launch and post-launch support, maintenance, and product releases. Recognized as one of the “Fastest Growing SME” in the Silicon Valley of India by Software Technology Parks of India, Nous has facilities spread across USA, UK, Germany, Canada and India.
