

About

Nous Infosystems (CMMi Level 5) is a global quality IT solutions provider. By combining core capabilities in developing product frameworks & solutions with unmatched expertise in technology skills and domain knowledge, Nous drives successful initiatives for onsite and offshore partnerships.

Technology & Business Groups

Enabling companies leverage IT for business value is our business call. We help customers unlock valuable information resources, improve production efficiencies, and build strong customer relationships, by working through the major 'Technology & Business Divisions' within Nous: [Software Services](#) | [EAS](#) | [Testree \(Independent Verification & Validation Testing Services\)](#) | [vServe 24/7 \(Remote Services Division\)](#)

Software Services

Nous' Software Services Division works with customers to accelerate development cycle and help them get to market faster. Our software services complement our customers' strategy with skills and support. With access to current and emerging technologies, best-of-breed solutions, global resources, mature development processes and a proven track record, we deliver compelling value for our customers, be it Offshore Product Development, Application Development & Maintenance, Data Mining & Data Warehousing, Mobile & Wireless Solutions, Migration & Application Porting and Enterprise Applications (to name a few).

EAS

Nous proven methodologies, which include SAP, Microsoft Dynamics AX and Oracle Applications, ensure best returns on our customers' enterprise application investments. Nous is an ideal partner for all software development and project maintenance requirements. For over a decade, we have been enabling mid-sized and large global enterprises, derive ROI on their ERP investments and help drive operational efficiency.

Testree

Testree offers Independent Verification & Validation Testing Services across industries. Complemented by Nous' extensive knowledge base, the breadth of scale and depth of experience, industry insight and strong technology know-how, we at Testree bring to the forefront our deep domain expertise in the space. Since we understand the challenges and the rewards that come with improved productivity and scalability, we could be your right partner in helping you build economies of scale.

vServe 24/7

vServe 24/7 is the Center of Excellence for Technical Support, Remote Infrastructure Management & Customer Contact Services. We help companies:

- Improve profitability & productivity through operational efficiencies
- Expand business volumes, markets and product offerings
- Deal with changing and challenging business environment

Deep Domain Knowledge

Nous Infosystems works with companies across the globe to provide technology solutions with assured business benefits in these verticals:

- BFSI
- Healthcare
- Education
- Retail & Logistics
- Utilities
- Construction
- Telecom
- Gaming

Technology Competencies

- Microsoft
- Open Source Systems Group
- Embedded Systems
- Legacy Systems
- A Host of Others

Key Business Benefits

Acting as a strategic guide to our customers, we;

- Shrink costs by about 40 per cent or more
- Deliver on time, and on budget
- Minimize risks, and improve productivity
- Reduce the complexity of your IS
- Provide improved computing performance, scalability, reliability and security
- Build easy-to-manage infrastructure & applications at the lowest possible costs
- Develop solutions that enable more efficient resource allocation, information-sharing & real-time availability of data

Key Strengths

One of the core strengths of Nous lies in its capability to recognize complementary technologies and solutions - both in MS and Non MS (Java and Legacy Systems) technologies. This proficiency, along with deep domain knowledge in verticals – BFSI, Retail, Healthcare, Education, Logistics and others – is a reflection of how intelligent partnering can deliver key business benefits and maximize ROI (Return on Investment).
